Experience

Company	Role	Year of Experience
Wissen Infotech	Senior Software Engineer	Jan 2022 – April 2026

Summary

- Over 4.3+ years of experience developing robust, scalable, and maintainable user interfaces using **Angular (v14, v16, v17, v19, v20)**
- Developed interactive and data-driven visualizations using **Chart.js** and **D3.js, ECharts**, improving user insights and dashboard usability.
- Integrated and consumed **RESTful APIs** while adhering to front-end security best practices and best UI UX principles.
- Developed responsive Angular apps using **Prime NG, Prime Flex, Angular Material, NG-Zorro**, and **Bootstrap**.
- Integrated **Google Pay** and **PayPal** payment gateways into Angular applications, enabling secure and seamless transaction processing.
- Using Components, Services, Dependency Injection, **RxJS**, Observables, Routing, Reactive Forms, HTTP Client
- Implemented social authentication using **Google** and **Facebook OAuth** to enable secure and seamless user register / login experiences.
- Utilized **Ag-Grid** to develop advanced, feature-rich data tables with sorting, filtering, pagination, editing for efficient data management.
- Integrated **Weglot** for multilingual support, enabling dynamic content translation and localization to enhance user experience.
- Implemented state management in Angular using **NgRx** and **RxJS** to handle complex data flows and maintain application scalability.
- Expertise in version control systems such as Git and Bitbucket, managing codebases, and fostering effective collaborative development.

Skills

- HTML5, CSS3, SCSS/SASS** – Structuring and styling Angular apps with modern, maintainable UI code.
- JavaScript (ES6+), TypeScript** – Writing robust, type-safe, and scalable frontend logic.
- Angular, Angular CLI, RxJS** – Building production-ready, reactive SPAs with efficient tooling.
- React + TypeScript** – Developing type-safe, component-based UIs.
- Responsive Design** – Creating mobile-first, cross-device compatible interfaces with Bootstrap and custom CSS.
- Node.js, Express** – Developing RESTful APIs, middleware, and backend services for scalable web applications.
- SQL** – Writing basic queries for efficient data retrieval.

Tools

- Code Editors:** Visual Studio Code, Stack blitz, My SQL workbench, Postman, MongoDB Campus, PyCharm, Jupiter notebook.
- Version Control:** GitHub, GitLab, and Bitbucket.

Projects

Consumer Portal Recharge Application [Duration: Aug- 2024 to present]

Tech-Stack: Microsoft SQL, Microsoft Azure, Angular 16, AG Grid, PrimeNG, NG Ant Design, RXJS, weglot

- This app allows users to quickly and securely recharge both international and domestic services, with a particular focus on the USA.
- Key features include seamless payments methods like PayPal and Google Pay. Users can earn reward points with each recharge.
- The app also offers an auto top-up feature, enabling users to schedule automatic recharges for added convenience. With its unique blend of user-friendly design, reward-based incentives, and flexible payment option.

Tila International Recharge Application [Duration: Dec - 2022 to present]

Tech-Stack: Microsoft SQL, Microsoft Azure, Angular 12, AG Grid, Angular Material, NG Ant Design, RXJS, ngx translate

- Tila International Recharge Application, a platform focused on providing seamless international and domestic recharge services.
- The app supports a variety of recharge types, including international, domestic, and Pinless with primary target audience in the USA.
- The solution aimed to simplify the process of mobile recharges and facilitate real-time transactions for users across different countries.

Movie- streamer [Duration: Dec- 2024 to Aprl-2025]

Tech-Stack: Angular 17, PrimeNg, RXJS,Vercel

- Movie-streamer application is built with Angular v17, this application Provides detailed information about each movie, including synopsis, cast, and ratings much more.
- Implemented dynamic movie listing and search functionality. Designed a clean and user-friendly layout for better user experience.
- Integrated APIs to fetch and display movie data in real time.

Education
